

How will remoting work at Reevoo?

We are fairly new to remoting and committed to make remoting an integral part of our culture, to do it well, and to treat remote workers no differently to those on site.

What about the hiring process?

Hiring will follow our normal process of a tech challenge, interviews, and a pairing exercise, all done remotely. Following this we will fly you over to spend a day with us.

How much time will I spend on site?

The first month will be on site, giving you a chance to really get to know us and how we work. Following this, we have all remotes on site for 2 weeks every other month. We will provide flights from within the EU and accommodation for these on site periods (and also try and cram in as much fun stuff as possible!).

Do you recruit from outside the EU?

Currently no, we are only recruiting inside the EU due to visa requirements and the cost of flights for the on site visits.

Are there any other requirements beyond the job spec?

You must have previous experience working remotely and a solid Internet connection (20Mbps/5Mbps with <100ms ping times, and no traffic throttling or caps)
